- SoundOff Signal LED3 Mini Light EL3SN and Axitech commander traffic advisor by corleone.
- Watchguard Video System and Whelen Freedom lightbar by BxBugs123.
- Toughbook CF31 by Ridgerunner designs.
- Skins by Dhruv.
- Handling by Sgt. Kanyo

Additional notes

- Known issues: Despite the base vehicle being fine, the doors and windows do not seem to take any damage from bullets when adorned with police lighting equipments. May/may not be fixed in future.
- The vehicle is fairly low-poly, comparable to stock vehicles.
- Ripping of this vehicle in any form is strictly prohibited.
- If you want to upload this archive somewhere else, please make sure you don't tamper with the readme file or any of its contents, given that you haven't made any changes to the model itself.
- In the end, I'd like to take a moment and thank other developers who invest time in equipment mods and leave them unlocked for public use. Had they not done so, this vehicle would have been incomplete.

Files included

- Vehicle files
- Parameters
- Readme
- Screenshots
- ELS config
