Credits

- Base model from Sim Raceway 3, ripped by DMN; parts of interior from Forza 4, editing, compilation, conversion, mapping and scratch-modeling done by Dhruv.*
- Handling by Sgt. Kanyo, other data lines by Dhruv.*

Additional notes

- The vehicle model has been left unlocked for fellow modders to help them enhance and sharpen their modding skills. A considerable amount of time and effort was spent in studying and researching on the real life videos of this car, converting it and aensuring the most accurate features' integration possible. Hence, practice of fair crediting is much appreciated and expected.*
- If you want to upload this archive somewhere else, please make sure you don't tamper with the readme file or any of its contents, given that you haven't made any changes to the model itself.*
- The vehicle is fairly mid-poly, especialy done to enhance the experience of those who starve for a full 3D/MQ interior.*
