Date added: 07-04-13

Scratchmade by Vertelvis

Features

- High detail exterior
- High detail interior
- High detail engine
- Medium detail underbody and chassis
- New York and Liberty City liveries and license plates included
- Both 2048x2048 and 1024x1024 livery resolutions available
- Liveries included: 1
- Livery 1: NYPD Emergency Service (LCPD Emergency Service)

Changelog

v1.1:

- New tire texture
- Small material tweaks

v1.2:

- Fixed a texture bug on the spare wheel

v1.3:

- Changed to a Sprinter 3500 model as used by the NYPD
- New front suspension
- New handling settings

WTD File

Different WTD files are supplied within the archive in the WTD folder. I do not recommend using the 1024x1024 livery WTD"s unless you have problems with 2048x2048 liveries, as the livery quality really suffers for it. I have tested this mod with 2048x2048 liveries and encountered no problems.

Disclaimer

This mod has been thoroughly tested on several systems and in both GTA IV and EFLC. I have run this mod for hours and hours without any crashes whatsoever. Any strange behaviour ingame is most probably caused by not following the installation instructions, not having the required mods installed or incompatibility with other installed mods. Be aware that you always install mods at your own risk, and I am not responsible for any problem caused by this mod.

Release Sites

This mod is released and is only allowed to be hosted on the following sites:

- www.vertelvis.com
- www.gta4-mods.com
- www.gtainside.com

I do not upload my mods on other sites because they don't allow me to update my mods, which I regularly do since I always want to supply the community with the latest versions of my mods. In other words, this is done with you in mind!

Release

A lot of time went into making this mod. It was first started in 2010 and after a long break I decided to finish this mod 3 months ago. Since then pretty much every bit of free time went into this mod. I hope you respect my work and respect the following:

- You can not upload this archive or parts of this archive on any sites. I have uploaded them on GTA4-mods, GTAINside and my own site and that are the only sites they are allowed to be hosted on.
- You can not claim any this or any part of this mod to be your work, or use this or any part of this mod in your own mods.

Thank you,

- Vertelvis
